Prior period	2023-04-01 to 2024-03-31

Prior period duration	366 days
Current period opening	2024-03-31
Current period	2024-04-01 to 2025-03-31
Current period duration	365 days

Exceptions to the standard settings

Only exceptional 'decimals' settings that would result in a loss of numeric accuracy are shown. A 'Reported Value' is only displayed where it differs from the 'Tagged Value' or if it is the subject of a warning or error. Actual dates appearing in the Period column are the result of an inability to map dates to current or prior periods and may indicate misalignment of instant or duration dates or unusual tagged events. Additional warning information in the Scale column indicates the scale implied by the document's context where this differs from the actual scale. Use of the deprecated 'precision' attribute in place of the 'decimals' attribute is indicated by "(derived)" in the the Decimal column. In these cases the 'decimals' value is derived from the value of the 'precision' attribute.

Prior period items appear with a grey background.
